My mission is to be an advocate and increase awareness of the importance of the arts in the lives of our children. Art allows us to explore, experiment and helps us keep in touch with our inner selves. For me Art Is A Universal language and the first language of children!! Art allows us to share cultures and bring us together in peace and harmony.

As an artist, I have been intrigued by patterns in nature and how they translate into all forms of art. I enjoy creating small spaces in my home that emphasize bright colors, textures and harmony. I have expressed my art over 35 years as an elementary art teacher in Florida.

I love abstract art and organic shapes. It is my feeling that it allows for unique interpretations. I also enjoy writing poetry, gardening and cooking which give freedom to artistic interpretation!
